

# Check Cashing ATM <MF300>

According to the National ATM Council, there are over 425,000 ATMs in the United States. Around 48% of these ATMs are owned and serviced by financial institutions like banks and credit unions. Over half of all ATMs are owned and managed by IADs, or Independent ATM Deployers.

The number of ATMs owned and operated by Independent ATM Deployers increases each year as more ATMs spring up at universities, malls, restaurants, and retail stores.

## PHILOSOPHY

The philosophy behind the MFS's MF300, Independent ATM Deployer is simple – accessibility. American citizens need greater access to cash. Various American Independent ATM Deployers need greater access to customers. MFS has created the MF300 to offer the lowest Total Cost of Ownership in the American market; so you can ensure every customer has access to basic financial transactions.

## AN IDEAL SOLUTION ...

With 2 cassettes and 1,600 notes, the MF300 ensures cash cycles will remain robust. The MF300 enables you to offer basic account functions to your most remote customers. It's loaded with Windows CE7.0, making it compatible with existing ATM software enabling the same transaction set and network access as existing Cash Dispensers. Optional touch screen and fingerprint reader make it easy to deploy in new locations.

## ACCESSIBILITY

The American market continues to change, but the need for cash has not. Traditional ATMs provide more services than ever and help customers reach financial goals, but the MF300 addresses dispense capability like never before.

MF300 is a front load lobby cash dispensing ATM with a business hour safe that is to be used in the Independent ATM Deployer (IAD) market.

A breakthrough in size, affordability and reliability, the MF300 stands alone in delivering affordable access at a most critical time.

## Features

### ARCHITECTURE

- The MF300 comes standard with a 2HI Dispenser Module (4HI Dispenser Module optional with 2,200notes)
- The MF300 was designed to withstand America's harsh climate so you don't have to worry about where to place it
